DIRECT MD 24/7 Powered By

HealthExpress 365 is an advanced, affordable, and preventive health benefits program to help you and your family stay safe and healthy from the comfort of home or on-the-go.

A revolutionary health benefits program that includes an annual check up, in-home health test, access to board-certified telemedicine doctors, psychiatrists and therapists, prescription savings, and medical bill negotiations so you and your family can live a long, healthy, and secure life.

Concept

This all started with a simple statement that resounded and gave us pause. The exact source of that statement has been lost to time, but the statement rings true: “With a simple blood test as many as 8 out of the 10 major killers can be prevented.” This statement had a profound impact for us.

It is our belief that we can deliver critically needed services at a cost-effective rate and, in the process, be a part of saving lives. Health and wellness is on everyone’s mind these days and we believe that most people want to be in control of their own wellness. Where there is a need, there is an opportunity! The existing programs in the market fall short of truly putting people in charge and simply do not provide a well-rounded approach.

It is our desire to reach the majority of households in the US. If you have Insurance our products serve as a compliment that adds ease and reduces expense (i.e. doctor visits on your phone, no deductibles, no co-insurance, etc.), and if you do not have basic health insurance our products afford you access to medical professionals. Our generalized target demographic is 25 – 60 with at least a high school education and employed with income above \$30,000 annually. A key benefit to the programs is that it can cover the entire family (up to 7 members) and they do not need to all be under 1 roof. This leads us to productive Sub-groups which include individual and families with children, and individuals and families with surviving parents (i.e. the member can cover their parents that live outside of the members home).

Mission Statement

DIRECT MD 24/7 Powered By HealthExpress 365 wants to Revolutionize how healthcare is delivered. A long and healthy life is what everyone seeks, and we want to provide, the path to achieve that goal. We see the tragedy of healthcare as it is today, and we need to change the conversation. Why do we let suffering and pain control our lives when, at least some of it, can be avoided? It is our mission, and we see it as our responsibility to change the perception and deliver affordable necessary care to those in need.

It is our goal and yes, our passion to reach every household and provide them with the services they need to take control of their own health and wellness, and we will do this at a reasonable expense.

The time for action is NOW! DIRECT MD 24/7 Powered By HealthExpress 365 wants to be part of the solution, not a contributor to the problem. We will accomplish our goals with hard work, insightful products, dedicated staff, and a comprehensive market approach.

Why DIRECT MD 24/7

Reduce your risk of disease and complications.
Know your underlying conditions
Early detections saves lives

Products and Services

DIRECT MD 24/7 Powered By HealthExpress 365 provides access to a physician 24/7/365 on your phone, via facetime, or web portal. No more waiting for an appointment at the convenience of a doctor's schedule, and no more germ-y waiting rooms. If medically appropriate, the doctor can prescribe medication and send the prescription to your local pharmacy. There is no limit to how many virtual appointments you can have and absolutely no copay or coinsurance. The member pays absolutely nothing out of pocket for the doctor visit.

Prescriptions are critical to managing health, and they are expensive! DIRECT MD 24/7 Powered By HealthExpress 365 has a multiple faceted prescription program that offers \$5 telemedicine prescriptions. A member can go to their local pharmacy with a prescription, present the DIRECT MD 24/7 Powered By HealthExpress 365 prescription card, and have the cost reduced right then and there. If the member is a diabetic, they can have access to free diabetic supplies.

What really sets us apart from the others in the space is our lab services. A member can get a simple and safe In-Home Health Test that is recognized by top global health organizations. Our test can identify serious health conditions that for some people can be life-threatening, including heart, liver and kidney disease, diabetes, cholesterol, and many forms of cancer. All of this from the safety and security of their own home. The testing kit comes directly to the member, and they mail it back in a postage paid container. They get the results from a portal provided by the lab and those results can be shared with their personal physician or reviewed without telemedicine provider.

Products and Services continued

There is a Behavioral Health benefit that can provide counseling. Our members do not have to suffer in silence and can get the help they need with personalized care from our licensed therapists and counselors that specialize in depression, anxiety, PTSD, and all forms of addiction.

We also provide a financial advocacy program that will help with prior and current medical bills. Everyone has heard the horror stories of out-of-control medical invoices and bills. Medical debt is a leading cause of bankruptcy in the country today. Our members can have a professional negotiate with the service providers and get reductions in the bills. In some cases, the reduction can be as large as 80% (actual reductions are subject to many factors)! Reducing debt enhances wellness as it reduces stress. We'll also make sure you receive the lowest possible price on any upcoming medical procedures. Financial aid is available to those in need.
